10 Squirrels with Props

* Digital Art

You may enter 5 images from the list of 10, but only 1 per category. If you are entering the Digital Art category as well, you would have a total of 6 entries.

The only restriction on what can be done in post processing to images entered in the Open and Topic categories is that it cannot be a composite image other than for an HDR or stitched Panoramic. It is now permissible to clone out parts of your image that are distracting.

** Digital Art entries are scored separately, with the Digital Artist of the Year award going to the member achieving the highest total score in the Digital Art categories over the season. The “Digital Art” category is intended to cover photographic images as a “Fine Art” form. There is no specific topic and there are no restrictions on what you do in image editing other than it must be based on at least one of your photographs and all of the editing must be done by you. The goal of this category is not a “photoshop wizardry challenge” but a challenge to create a piece of art that would be worthy of framing and hanging on a wall in a gallery or your living room.*
